

## SECTION 1: Identification

### 1.1. Identification

Product form : Mixture  
Product name : Vanilla Fragrance  
CAS-No. : N/A  
Product code : EOC092

### 1.2. Recommended use and restrictions on use

### 1.3. Supplier

Essential Oil Company  
2150 Industrial Drive  
Niles, MI 49120 - United States  
T 888-541-9089  
info@essentialoil.com - www.essentialoil.com

### 1.4. Emergency telephone number

Emergency number : CHEMTREC - USA: 800-424-9300 International: +1 703-527-3887 / 1-800-424-9300  
CCN: 1026184

## SECTION 2: Hazard(s) identification

### 2.1. Classification of the substance or mixture

#### GHS US classification

|                                                               |                                                                   |
|---------------------------------------------------------------|-------------------------------------------------------------------|
| Serious eye damage/eye irritation Category 2                  | Causes serious eye irritation                                     |
| Skin sensitization, Category 1                                | May cause an allergic skin reaction                               |
| Specific target organ toxicity (repeated exposure) Category 2 | May cause damage to organs through prolonged or repeated exposure |

### 2.2. GHS Label elements, including precautionary statements

#### GHS US labeling

Hazard pictograms (GHS US) :

Signal word (GHS US) : Warning

Hazard statements (GHS US) : May cause an allergic skin reaction  
Causes serious eye irritation  
May cause damage to organs through prolonged or repeated exposure

Precautionary statements (GHS US) : Do not breathe dust/fume/gas/mist/vapors/spray.  
Avoid breathing dust/fume/gas/mist/vapors/spray.  
Wash hands, forearms and face thoroughly after handling.  
Contaminated work clothing must not be allowed out of the workplace.  
Wear protective gloves/protective clothing/eye protection/face protection.  
If on skin: Wash with plenty of water.  
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
Get medical advice/attention if you feel unwell.  
Specific treatment (see supplemental first aid instruction on this label).  
If skin irritation or rash occurs: Get medical advice/attention.  
If eye irritation persists: Get medical advice/attention.  
Wash contaminated clothing before reuse.  
Dispose of contents/container to hazardous or special waste collection point, in accordance with local, regional, national and/or international regulation.

### 2.3. Other hazards which do not result in classification

No additional information available

# Vanilla Fragrance

## Safety Data Sheet

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

### 2.4. Unknown acute toxicity (GHS US)

Not applicable

## SECTION 3: Composition/Information on ingredients

### 3.1. Substances

Not applicable

### 3.2. Mixtures

| Name              | Product identifier | %       | GHS US classification                                                           |

Full text of hazard classes and H-statements : see section 16

## SECTION 4: First-aid measures

### 4.1. Description of first aid measures

- First-aid measures general : Get medical advice/attention if you feel unwell.
- First-aid measures after inhalation : Remove person to fresh air and keep comfortable for breathing.
- First-aid measures after skin contact : Wash skin with plenty of water. Take off contaminated clothing. If skin irritation or rash occurs: Get medical advice/attention.
- First-aid measures after eye contact : Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
- First-aid measures after ingestion : Call a poison center/doctor/physician if you feel unwell.

### 4.2. Most important symptoms and effects (acute and delayed)

- Symptoms/effects after skin contact : May cause an allergic skin reaction.
- Symptoms/effects after eye contact : Eye irritation.

### 4.3. Immediate medical attention and special treatment, if necessary

Treat symptomatically.

## SECTION 5: Fire-fighting measures

### 5.1. Suitable (and unsuitable) extinguishing media

- Suitable extinguishing media : Water spray. Dry powder. Foam. Carbon dioxide.

### 5.2. Specific hazards arising from the chemical

- Reactivity : The product is non-reactive under normal conditions of use, storage and transport.

### 5.3. Special protective equipment and precautions for fire-fighters

- Protection during firefighting : Do not attempt to take action without suitable protective equipment. Self-contained breathing apparatus. Complete protective clothing.

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

#### 6.1.1. For non-emergency personnel

- Emergency procedures : Ventilate spillage area. Do not breathe dust/fume/gas/mist/vapors/spray. Avoid contact with skin and eyes.

#### 6.1.2. For emergency responders

- Protective equipment : Do not attempt to take action without suitable protective equipment. For further information refer to section 8: "Exposure controls/personal protection".

### 6.2. Environmental precautions

Avoid release to the environment.

### 6.3. Methods and material for containment and cleaning up

- Methods for cleaning up : Take up liquid spill into absorbent material.

# Vanilla Fragrance

## Safety Data Sheet

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

Other information : Dispose of materials or solid residues at an authorized site.

### 6.4. Reference to other sections

For further information refer to section 13.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

Precautions for safe handling : Ensure good ventilation of the work station. Do not breathe dust/fume/gas/mist/vapors/spray. Avoid contact with skin and eyes. Wear personal protective equipment.

Hygiene measures : Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Always wash hands after handling the product.

### 7.2. Conditions for safe storage, including any incompatibilities

Storage conditions : Store in a well-ventilated place. Keep cool.

## SECTION 8: Exposure controls/personal protection

### 8.1. Control parameters

|                                                   |                     |

### 8.2. Appropriate engineering controls

Appropriate engineering controls : Ensure good ventilation of the work station.

Environmental exposure controls : Avoid release to the environment.

### 8.3. Individual protection measures/Personal protective equipment

#### Hand protection:

Protective gloves

#### Eye protection:

Safety glasses

#### Skin and body protection:

Wear suitable protective clothing

#### Respiratory protection:

In case of insufficient ventilation, wear suitable respiratory equipment

## Safety Data Sheet

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

### SECTION 9: Physical and chemical properties

#### 9.1. Information on basic physical and chemical properties

|                                                 |                                                 |
|-------------------------------------------------|-------------------------------------------------|
| Physical state                                  | : Liquid                                        |
| Color                                           | : PALE YELLOW TO PALE AMBER LIQUID              |
| Odor                                            | : CHARACTERISTIC, MATCHING THE RETAINER SAMPLE. |
| Odor threshold                                  | : No data available                             |
| pH                                              | : No data available                             |
| Melting point                                   | : Not applicable                                |
| Freezing point                                  | : No data available                             |
| Boiling point                                   | : No data available                             |
| Flash point                                     | : 124 °C                                        |
| Relative evaporation rate (butyl acetate=1)     | : No data available                             |
| Flammability (solid, gas)                       | : Not applicable.                               |
| Vapor pressure                                  | : No data available                             |
| Relative vapor density at 20°C                  | : No data available                             |
| Relative density                                | : 1.149 (1.139 – 1.159)                         |
| Solubility                                      | : Insoluble.                                    |
| Partition coefficient n-octanol/water (Log Pow) | : No data available                             |
| Auto-ignition temperature                       | : No data available                             |
| Decomposition temperature                       | : No data available                             |
| Viscosity, kinematic                            | : No data available                             |
| Viscosity, dynamic                              | : No data available                             |
| Explosion limits                                | : No data available                             |
| Explosive properties                            | : No data available                             |
| Oxidizing properties                            | : No data available                             |

#### 9.2. Other information

|                  |                         |
|------------------|-------------------------|
| Refractive index | : 1.537 (1.527 – 1.547) |
|------------------|-------------------------|

### SECTION 10: Stability and reactivity

#### 10.1. Reactivity

The product is non-reactive under normal conditions of use, storage and transport.

#### 10.2. Chemical stability

Stable under normal conditions.

#### 10.3. Possibility of hazardous reactions

No dangerous reactions known under normal conditions of use.

#### 10.4. Conditions to avoid

None under recommended storage and handling conditions (see section 7).

#### 10.5. Incompatible materials

No additional information available

#### 10.6. Hazardous decomposition products

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

### SECTION 11: Toxicological information

#### 11.1. Information on toxicological effects

|                         |                  |
|-------------------------|------------------|
| Acute toxicity (oral)   | : Not classified |
| Acute toxicity (dermal) | : Not classified |

# Vanilla Fragrance

## Safety Data Sheet

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

Acute toxicity (inhalation) : Not classified

| LC50 - Fish [1]             | 57 mg/l (Equivalent or similar to OECD 203, 96 h, Pimephales promelas, Flow-through system, Fresh water, Experimental value)                      |
| EC50 - Crustacea [1]        | 36.79 mg/l (OECD 202: Daphnia sp. Acute Immobilisation Test, 48 h, Daphnia magna, Static system, Fresh water, Experimental value, GLP)            |
| LC50 - Fish [2]             | 123 mg/l Test organisms (species): Pimephales promelas                                                                                            |
| ErC50 algae                 | 120 mg/l (OECD 201: Alga, Growth Inhibition Test, 72 h, Pseudokirchneriella subcapitata, Static system, Fresh water, Experimental value, GLP)     |
| LOEC (chronic)              | 10 mg/l Test organisms (species): Daphnia magna Duration: '21 d'                                                                                  |
| NOEC (chronic)              | 5.9 mg/l Test organisms (species): Daphnia magna Duration: '21 d'                                                                                 |
| ANISIC ALDEHYDE (123-11-5)  |                                                                                                                                                   |
| LC50 - Fish [1]             | 148.32 mg/l (DIN 38412-15, 96 h, Leuciscus idus, Static system, Fresh water, Experimental value, Lethal)                                          |
| EC50 - Crustacea [1]        | 82.8 mg/l (EU Method C.2, 48 h, Daphnia magna, Static system, Fresh water, Experimental value, Lethal)                                            |
| ErC50 algae                 | 61 mg/l (DIN 38412-9, 72 h, Pseudokirchneriella subcapitata, Static system, Fresh water, Experimental value, Growth rate)                         |
| LOEC (chronic)              | 1.53 mg/l Test organisms (species): Daphnia magna Duration: '21 d'                                                                                |
| NOEC (chronic)              | 0.71 mg/l Test organisms (species): Daphnia magna Duration: '21 d'                                                                                |
| DIETHYL PHTHALATE (84-66-2) |                                                                                                                                                   |
| LC50 - Fish [1]             | 12 mg/l (EPA 660/3 - 75/009, 96 h, Oncorhynchus mykiss, Flow-through system, Fresh water, Experimental value)                                     |
| ErC50 algae                 | 45 mg/l (Equivalent or similar to OECD 201, 72 h, Desmodesmus subspicatus, Static system, Fresh water, Experimental value, Nominal concentration) |

#### 12.2. Persistence and degradability

| VANILLIN (121-33-5)           |                                                            |
|-------------------------------|------------------------------------------------------------|
| Persistence and degradability | Readily biodegradable in water.                            |
| ANISIC ALDEHYDE (123-11-5)    |                                                            |
| Persistence and degradability | Readily biodegradable in water.                            |
| DIETHYL PHTHALATE (84-66-2)   |                                                            |
| Persistence and degradability | Biodegradable in the soil. Readily biodegradable in water. |

#### 12.3. Bioaccumulative potential

# Vanilla Fragrance

## Safety Data Sheet

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

| VANILLIN (121-33-5)                             |                                                                                                         |
|-------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| Partition coefficient n-octanol/water (Log Pow) | 1.17 (Experimental value, OECD 107: Partition Coefficient (n-octanol/water): Shake Flask Method, 25 °C) |
| Bioaccumulative potential                       | Low potential for bioaccumulation (Log Kow < 4).                                                        |
| ANISIC ALDEHYDE (123-11-5)                      |                                                                                                         |
| Partition coefficient n-octanol/water (Log Pow) | 1.56 (Practical experience/observation, Equivalent or similar to OECD 107, 25 °C)                       |
| Bioaccumulative potential                       | Low potential for bioaccumulation (Log Kow < 4).                                                        |
| DIETHYL PHTHALATE (84-66-2)                     |                                                                                                         |
| Partition coefficient n-octanol/water (Log Pow) | 2.2 (Experimental value, OECD 117: Partition Coefficient (n-octanol/water), HPLC method, 40 °C)         |
| Bioaccumulative potential                       | Low potential for bioaccumulation (Log Kow < 4).                                                        |

### 12.4. Mobility in soil

| VANILLIN (121-33-5)                                        |                                                                                                                                                                                    |
|------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Organic Carbon Normalized Adsorption Coefficient (Log Koc) | 3.438 (log Koc, Experimental value)                                                                                                                                                |
| Ecology - soil                                             | Low potential for mobility in soil.                                                                                                                                                |
| ANISIC ALDEHYDE (123-11-5)                                 |                                                                                                                                                                                    |
| Surface tension                                            | No data available in the literature                                                                                                                                                |
| Organic Carbon Normalized Adsorption Coefficient (Log Koc) | 1 (log Koc, SRC PCKOCWIN v2.0, Experimental value)                                                                                                                                 |
| Ecology - soil                                             | Highly mobile in soil.                                                                                                                                                             |
| DIETHYL PHTHALATE (84-66-2)                                |                                                                                                                                                                                    |
| Surface tension                                            | 37.5 mN/m (20 °C)                                                                                                                                                                  |
| Organic Carbon Normalized Adsorption Coefficient (Log Koc) | 2.34 (log Koc, OECD 121: Estimation of the Adsorption Coefficient (Koc) on Soil and on Sewage Sludge using High Performance Liquid Chromatography (HPLC), Experimental value, GLP) |
| Ecology - soil                                             | Low potential for adsorption in soil.                                                                                                                                              |

### 12.5. Other adverse effects

No additional information available

## SECTION 13: Disposal considerations

### 13.1. Disposal methods

Waste treatment methods : Dispose of contents/container in accordance with licensed collector's sorting instructions.

## SECTION 14: Transport information

### Department of Transportation (DOT)

In accordance with DOT

Not regulated

### Transportation of Dangerous Goods

Not regulated

### Transport by sea

Not regulated

### Air transport

Not regulated
